# Contents

Introduction.....	1
<b>1. Mathematical Foundations.....</b>	<b>5</b>
1.1. Fuzzy and Possibilistic Measures, Possibilistic Variables ( <i>PV</i> ) and their Distributions.....	5
1.2. <i>Min</i> -related Possibilistic Variables.....	15
1.3. Functions of Possibilistic Variables.....	17
1.4. Some Classes of Fuzzy Numbers.....	19
1.5. Relations between <i>PV</i> .....	23
1.6. Formal Comparison of Possibility and Probability.....	29
1.7. Interval Mathematical Tools.....	31
<b>2. Formalization of Optimality Principles and Decision Making with Possibilistic Data.....</b>	<b>35</b>
2.1. Basic Principles of Optimality. Examples.....	35
2.2. General Mathematical Models.....	38
2.2.1. Models of Criteria.....	38
2.2.2. Models of Restrictions.....	40
2.2.3. Models of Decision Making.....	41
2.3. Some Remarks on the Classification of Problems and Methods in Possibilistic Optimization.....	43
<b>3. Indirect Methods of Single Objective Possibilistic Programming.....</b>	<b>44</b>
3.1. Modelling the Elements.....	45
3.1.1. Modal Value Problem.....	45
3.1.2. Measures of Fulfilling a Single Restriction.....	45
3.1.3. Measures of Fulfilling Several Restrictions (Non-Separated Case).....	53

3.1.4. Maximax Model. ....	58
3.2. Deterministic Analogies of Possibilistic Optimization Problems. ....	60
3.2.1. Modal Values Optimization. ....	60
3.2.2. Maximizing the Possibility of Fulfilling the Objective with Demands on the Possibilities of the Restrictions (Separated Case). ....	61
3.2.3. Maximax Model with Demands on the Possibilities of the Restrictions (Separated Case). ....	68
3.2.4. Maximizing the Possibility of Fulfilling the Objective with Demands on the Possibilities of the Restrictions (Non-Separated Case). ....	70
<b>4. Decision Rules in Possibilistic Programming. ....</b>	<b>72</b>
4.1. Linear Decision Rules with Monotonous Functions. ....	74
4.2. Remarks on Further Decision Making. ....	77
4.2.1. Defuzzification. ....	77
4.2.2. Linguistic Approximation. ....	79
<b>5. On the Relationship between Possibilistic and Probabilistic Programming. ....</b>	<b>83</b>
5.1. On Possibilistic-Probabilistic Transformations. ....	83
5.1.1. Determination of Probability. ....	84
5.1.2. Determination of Possibility. ....	88
5.2. On the Equivalence of Possibilistic and Stochastic Optimization. ....	89
5.3. Possibilistic Random Tasks. ....	93
<b>6. On Direct Methods in Possibilistic Programming. ....</b>	<b>101</b>
